

IMPORTANT

Please shower immediately before swimming (not just at home)

Why?

Our pool is kept safe and healthy by low use of chemicals, including copper ionisation
Copper can leave a green tinge on dry skin, dry clothing or dry hair (particularly pale/light)
So please make sure your hair, clothing and skin are wet on entering the pool to prevent this

Any affects of copper discolouration are harmless. We accept no responsibility for any discolouration to skin, hair or clothing due to copper, as this is avoidable. All pool users are assumed to have read and understood the rules before entering the pool. No exceptions. Thank you for your cooperation.
